Cordless Threaded Insert Tool to M8

This tool is equipped with a single trigger operation and pulling mechanism capable of setting M4, M5, M6 & M8 threaded inserts. It features a dual speed gear box that enable maximum power for the selected inserts. The operator can adjust the insert compression via the 18 level clutch on the nose of the tool. Nose attachments are easily changed as no internal dismantling is required.

Purposefully packaged in a plastic carry case this tool makes an excellent on-site emergency or maintenance type of tool. The case has room for the spare battery also included in the package.

Features:

- Supplied in a lightweight carry case
- Dual Speed Gearbox
- 40 minute Intelli-Charger
- LED Guide Light
- Handy Belt Clip
- Durable 14.4V Operation
